

# A complimentary approach to Atlantic cod stock assessment on the Faroe Bank using environmental DNA samples

Ian Salter, Ph.D

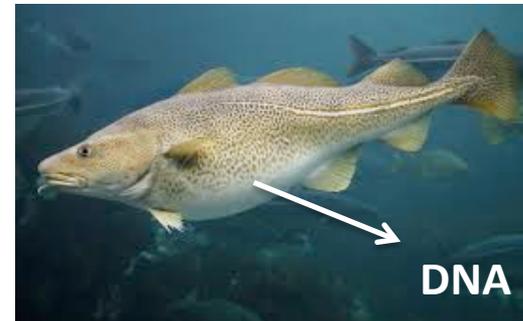

What is environmental DNA?

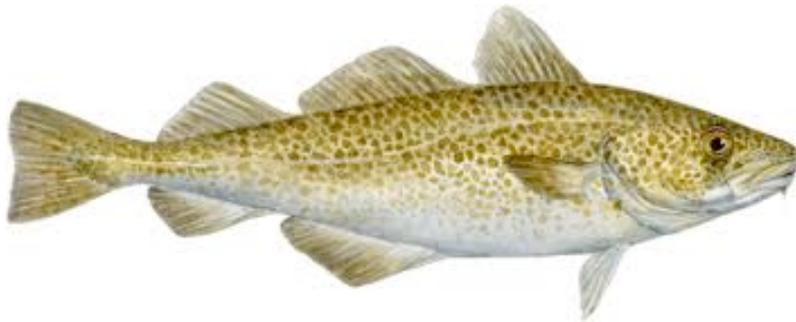

All of the DNA that can be recovered from an environmental sample

## Microscopic organisms

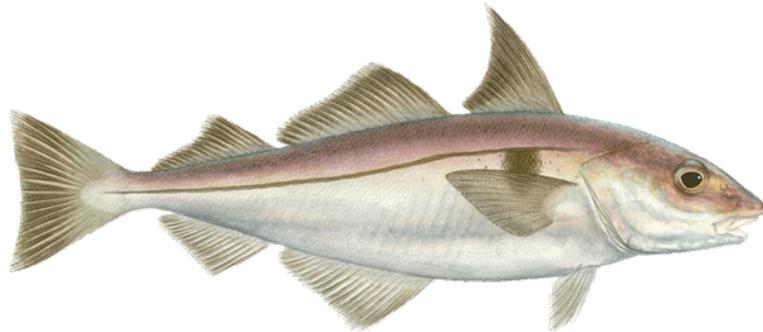

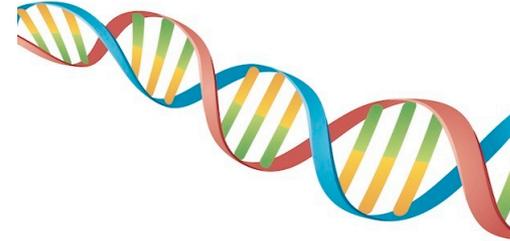

## Larger organisms

AACCTTGACGTAGTAGCAGTGGTACGA

GACGTTAGCCAGGTAGGCAGGTAGGACG

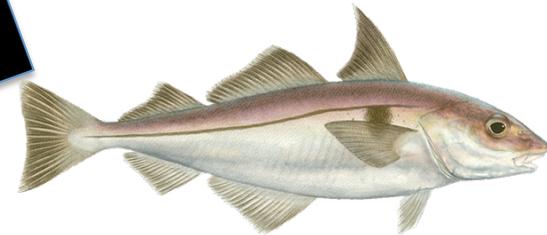

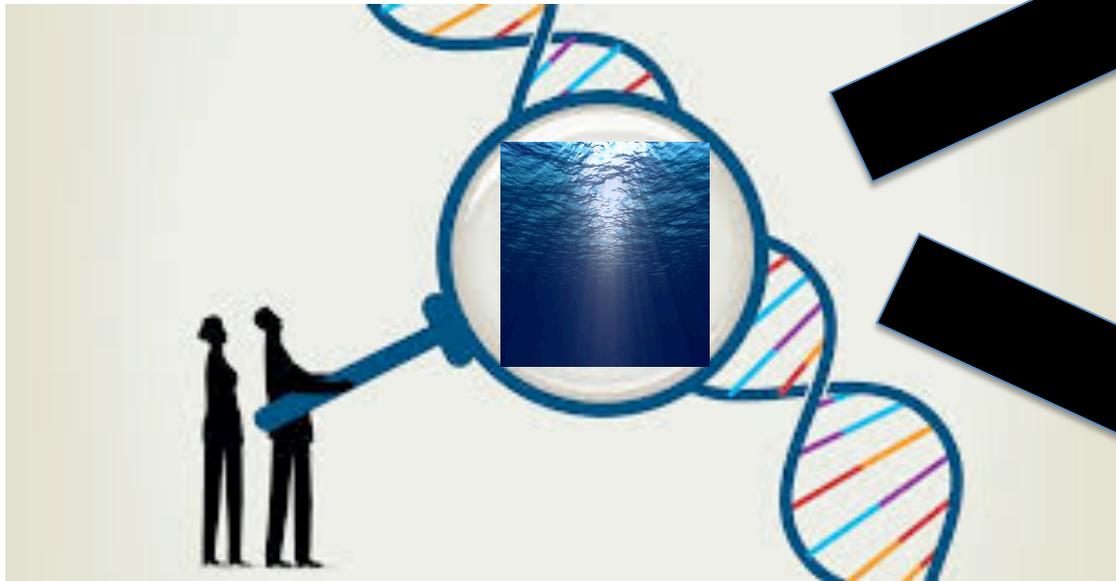

CGTATATGTTTATTGCAACGTATTACGTATA

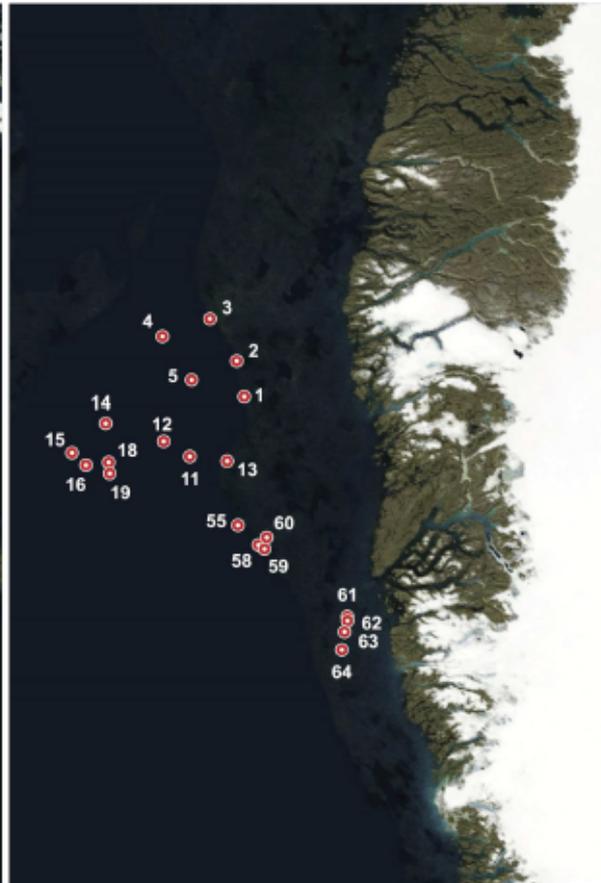

## Environmental Forensics

## Environmental Forensics

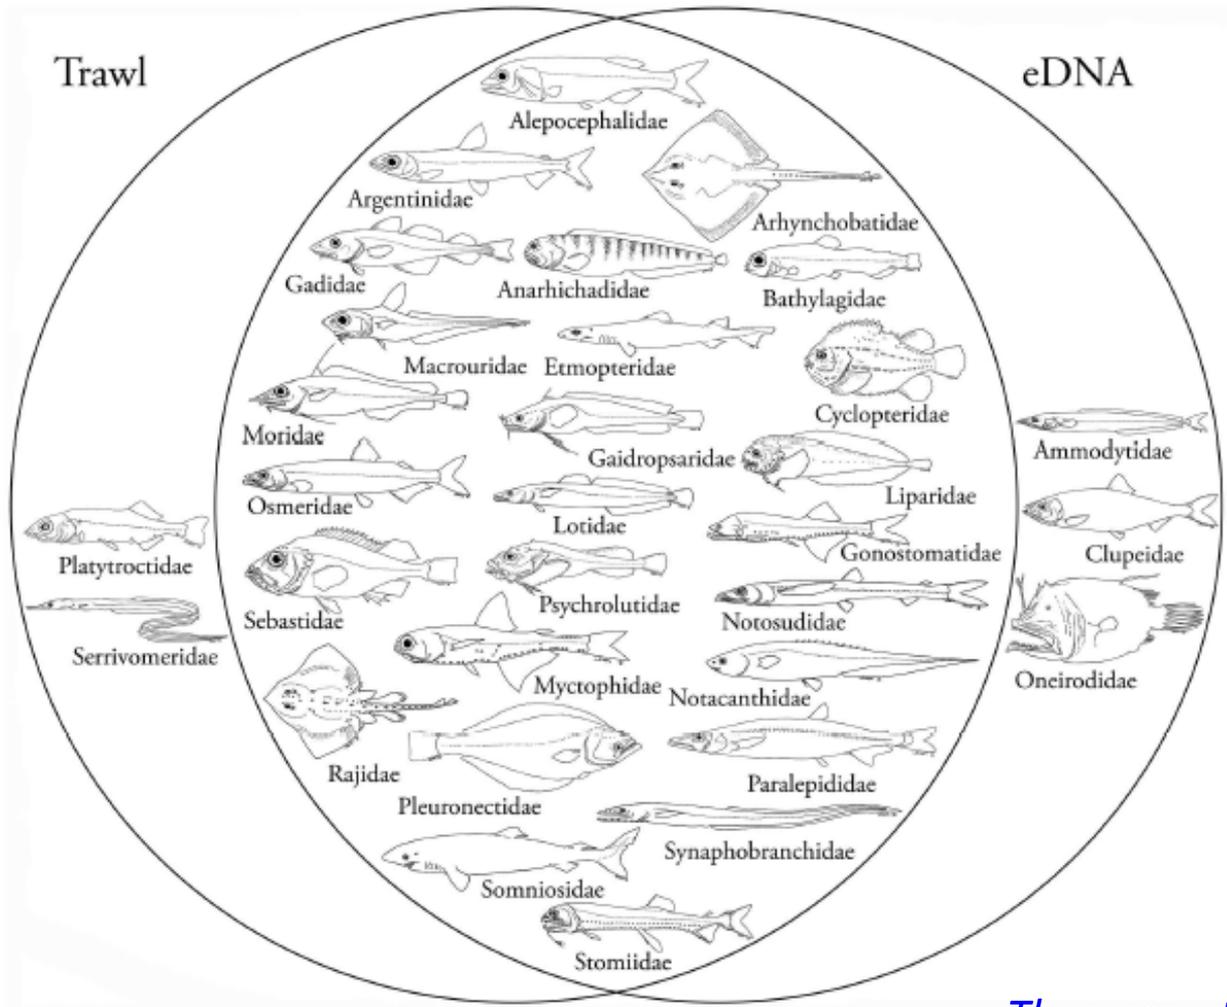

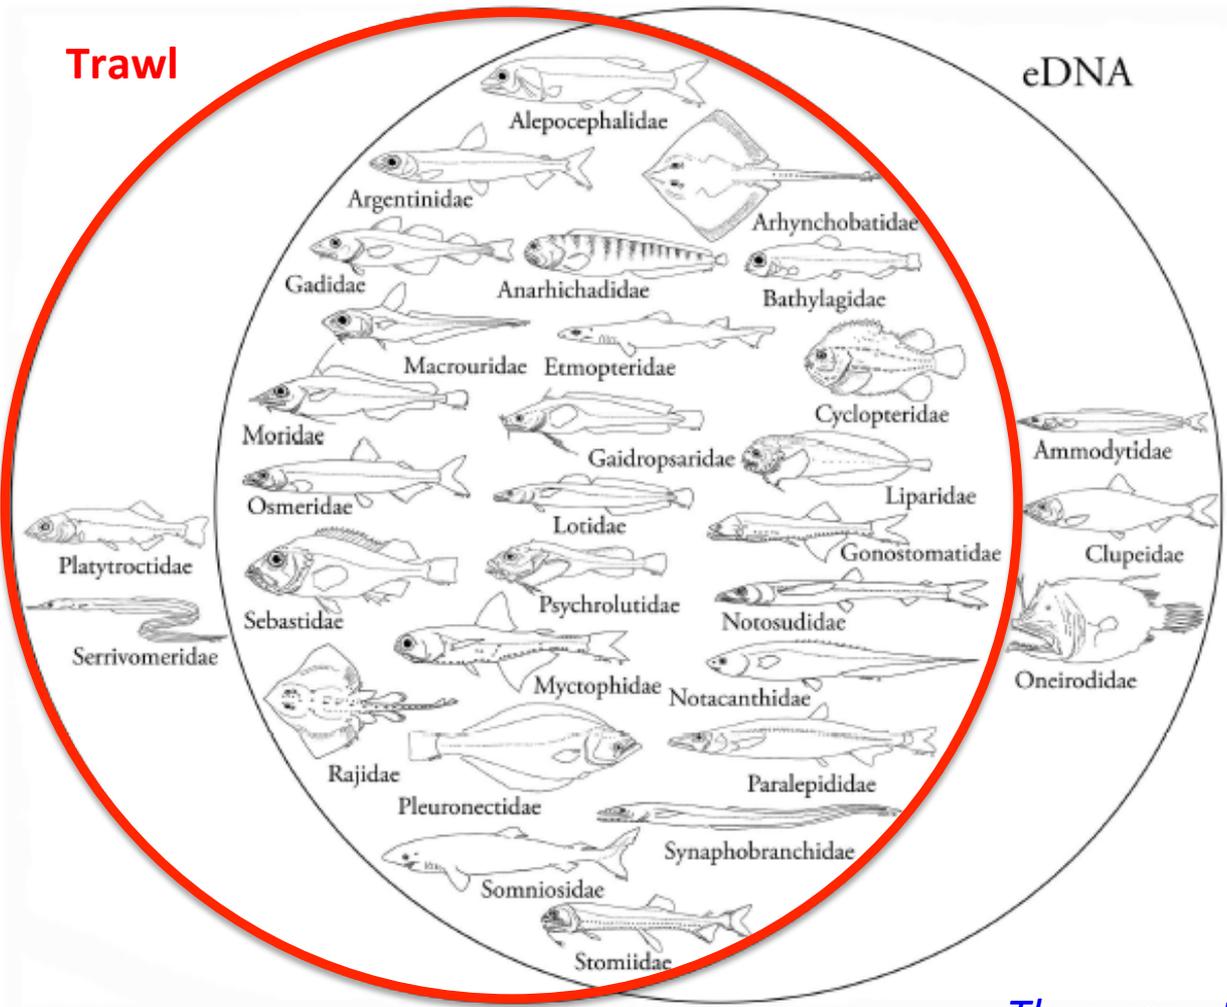

## How does eDNA analysis perform in the field ?

1.5 litre water samples

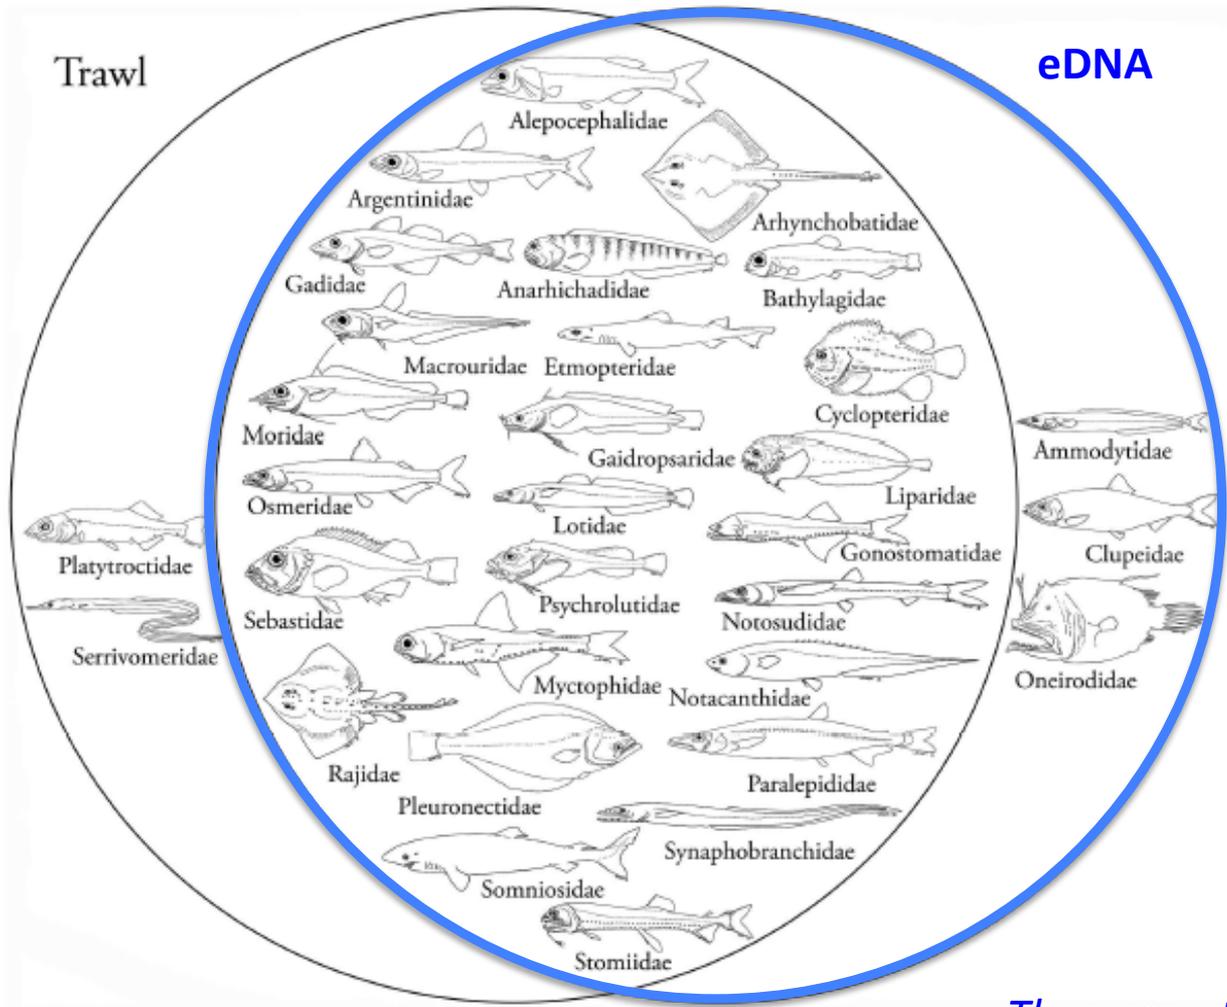

Collected prior to  
bottom-trawl

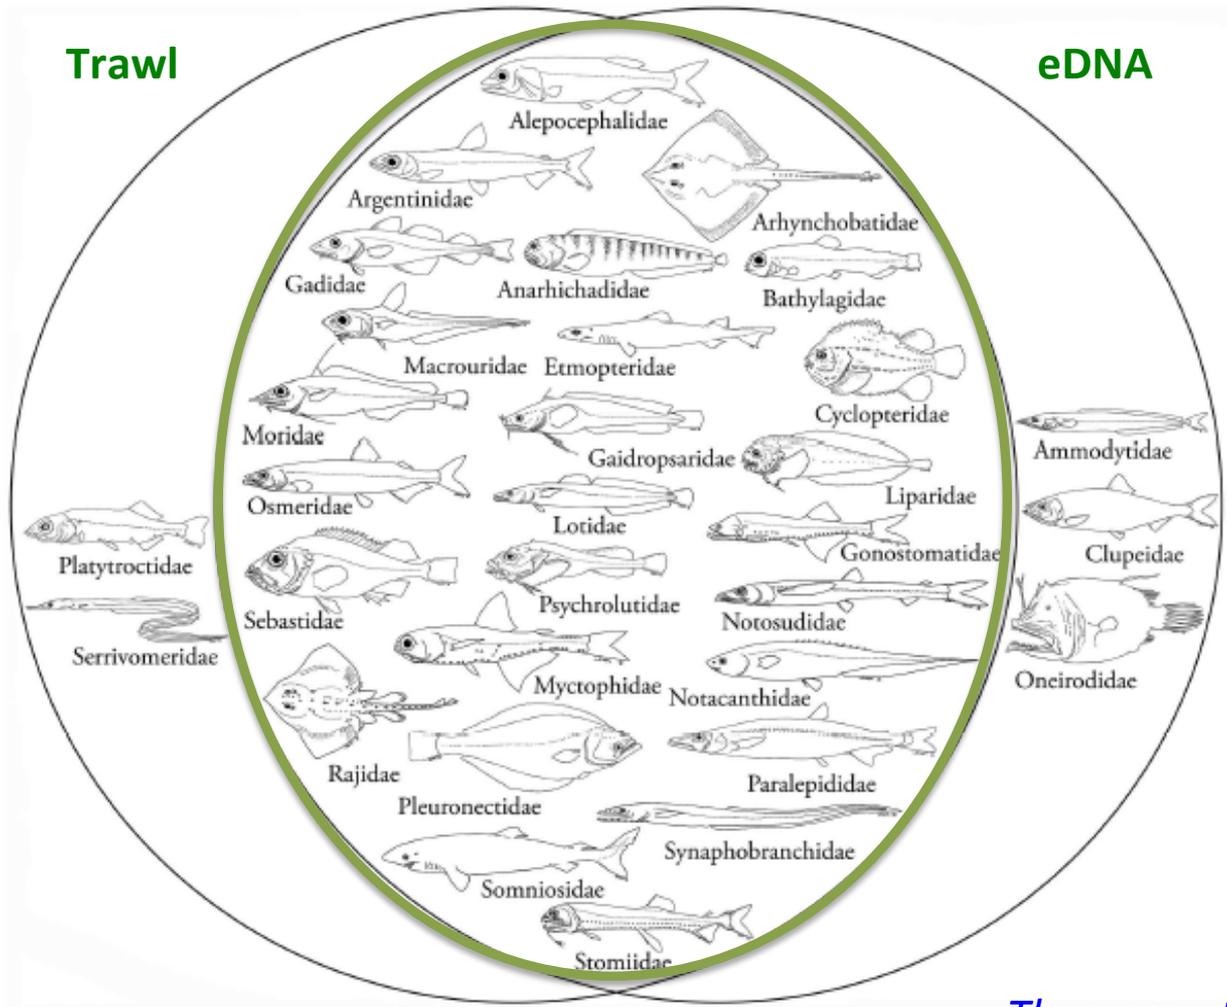

How does eDNA analysis perform in the field ?

26 of 28

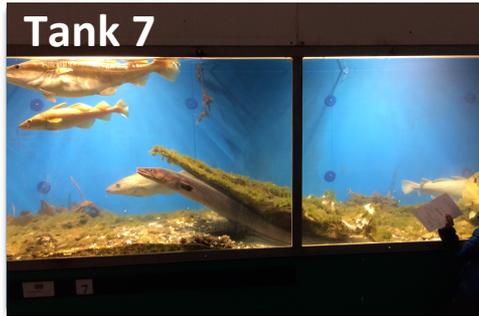

>90%  
detection  
rate

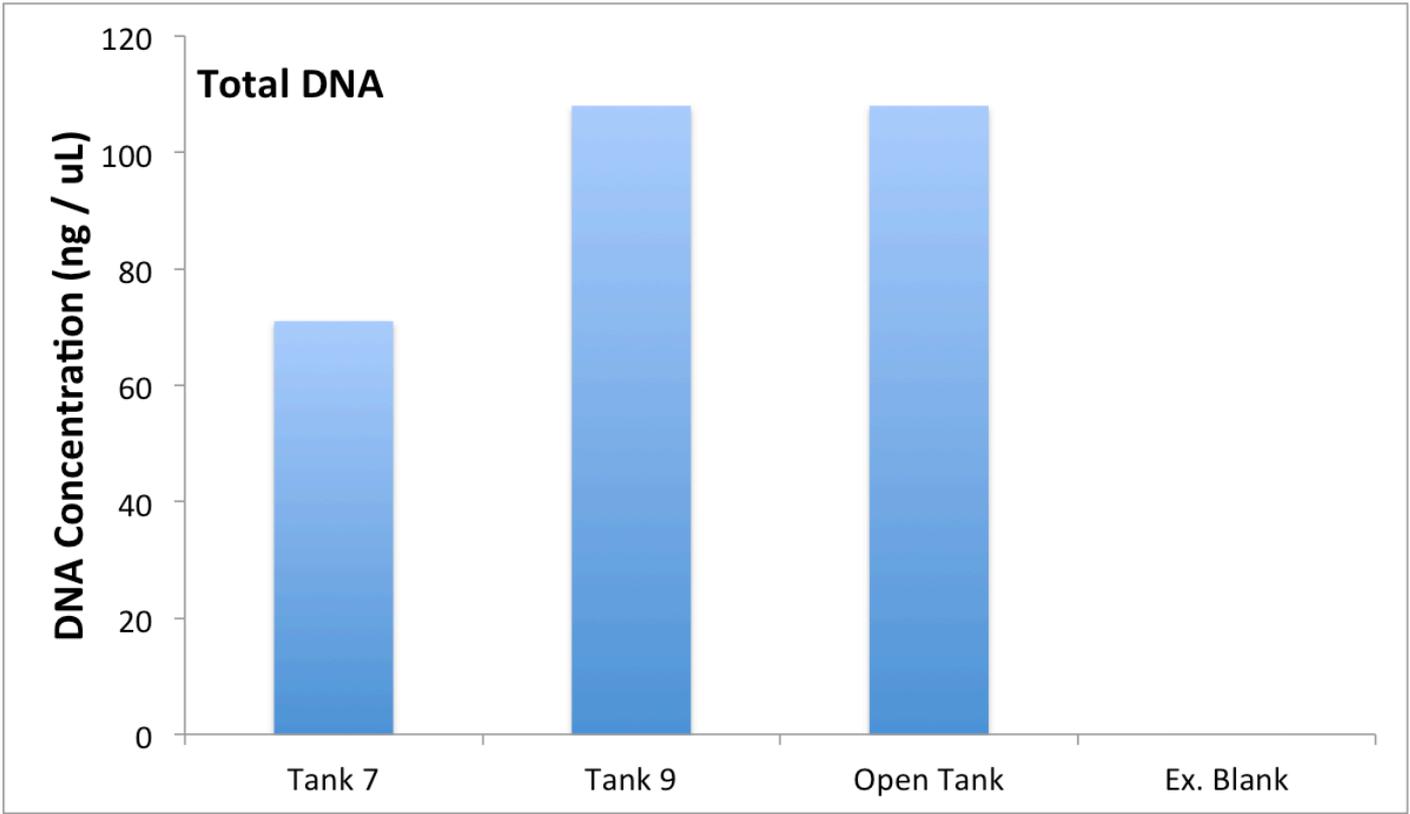

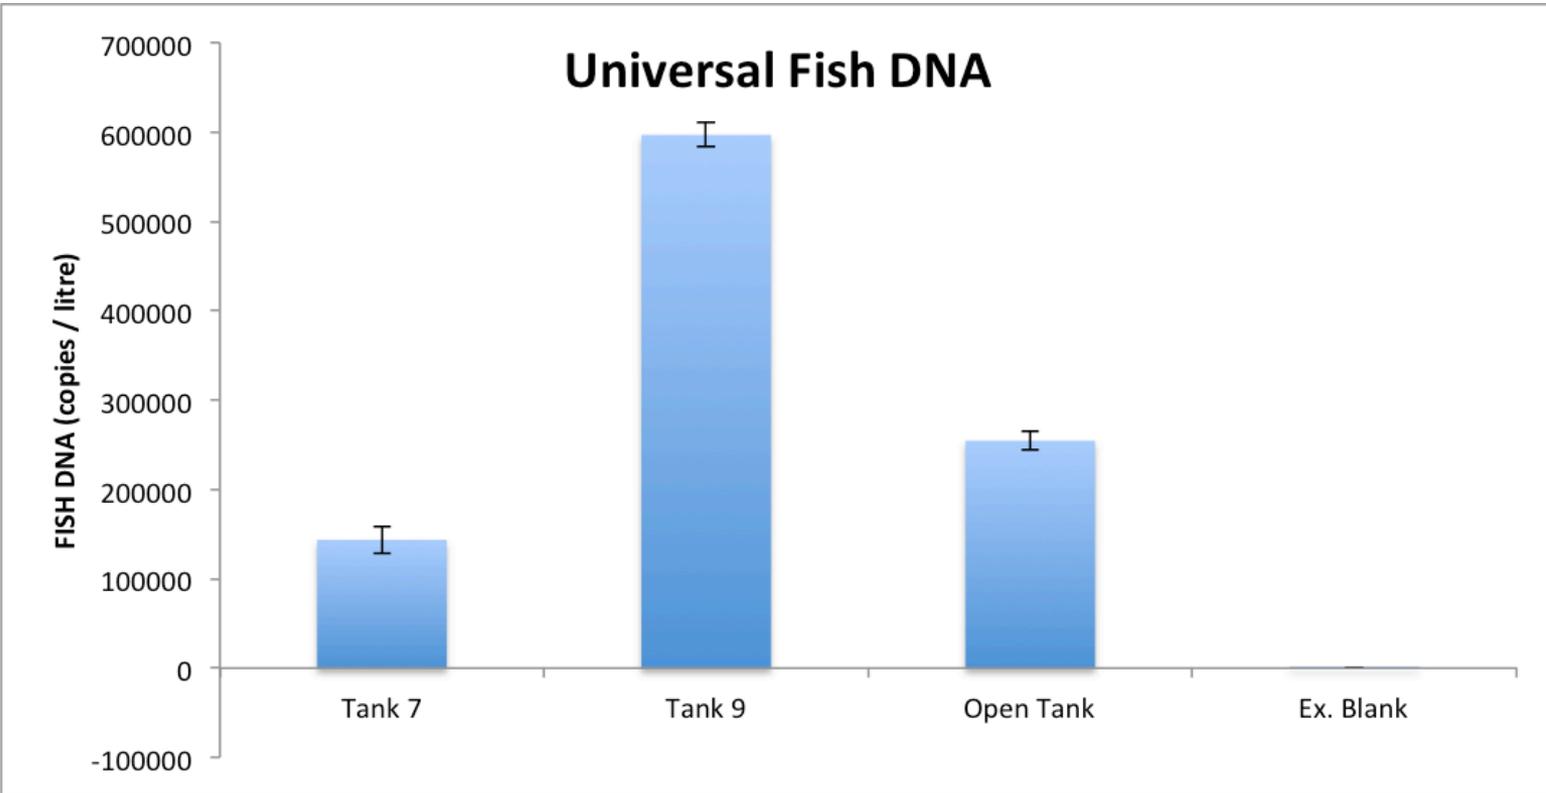

Environmental DNA analysis has proven useful for detecting the presence of a broad group of fish species

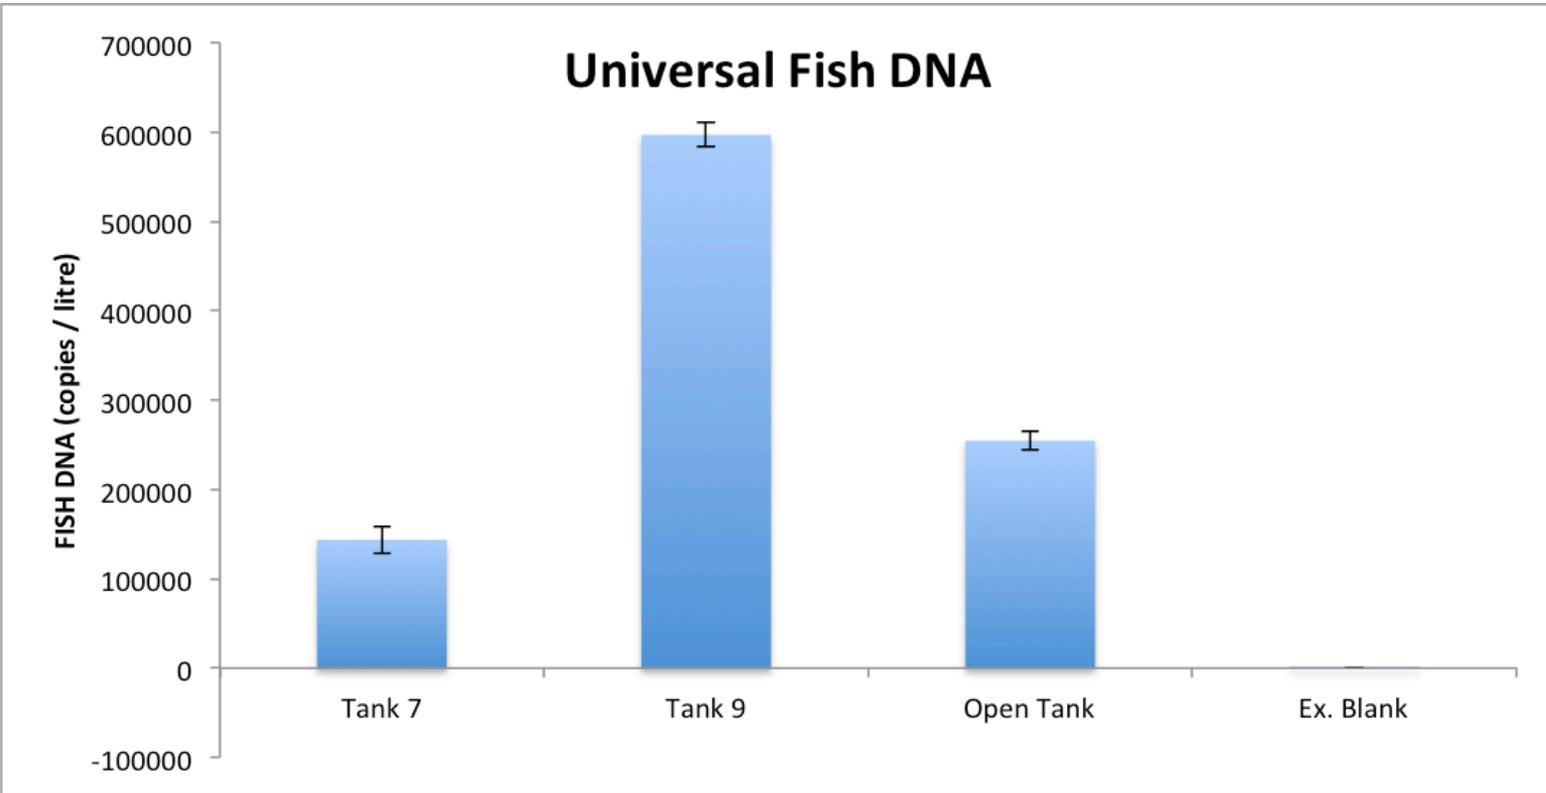

Is the quantity of DNA from a species in an environmental sample linked to it's abundance and / or biomass?

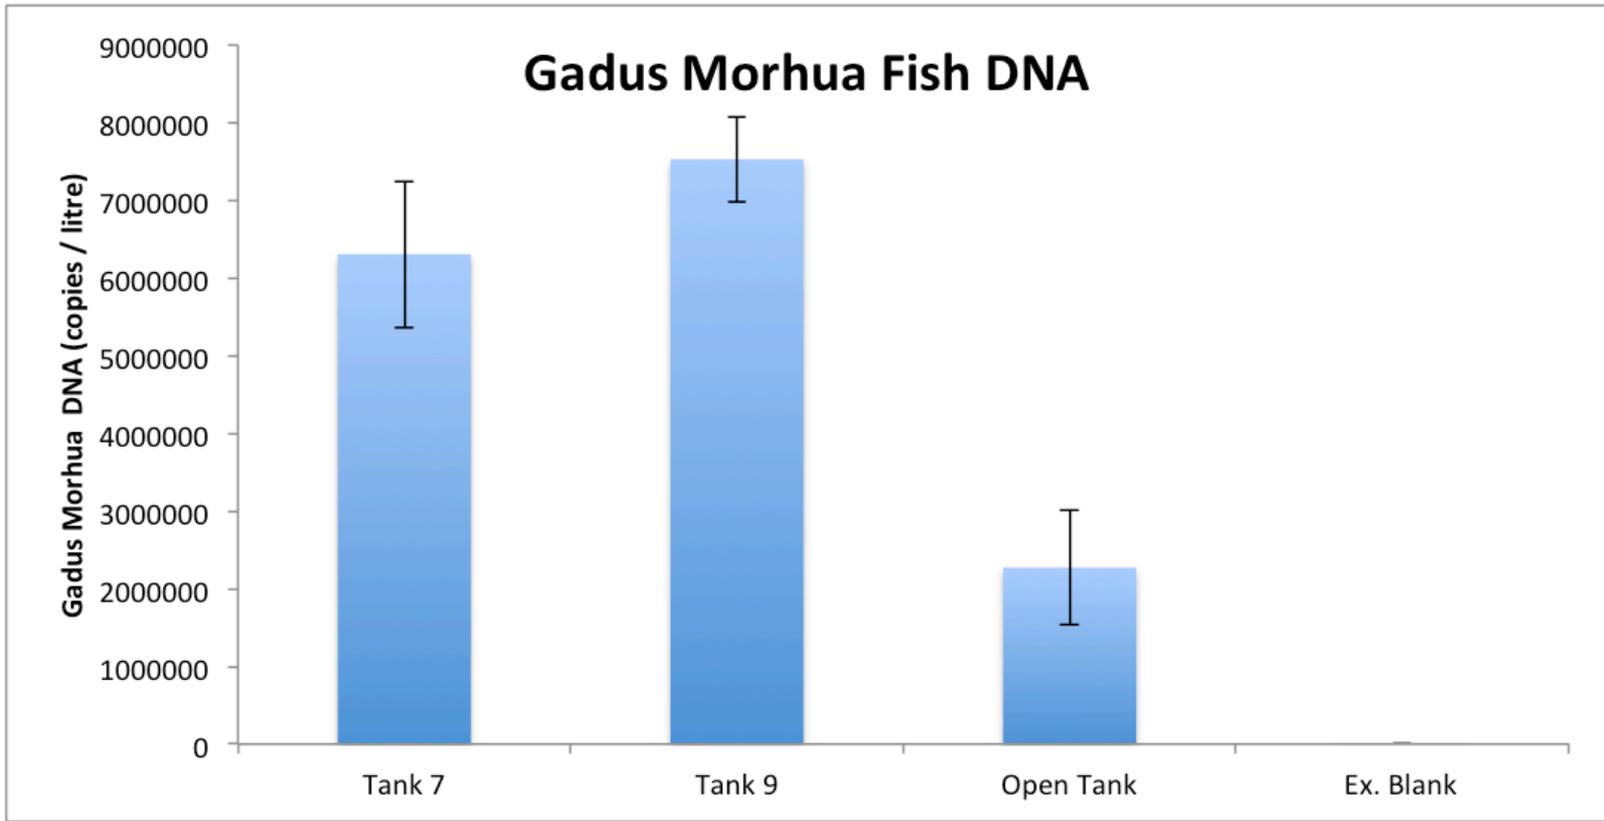

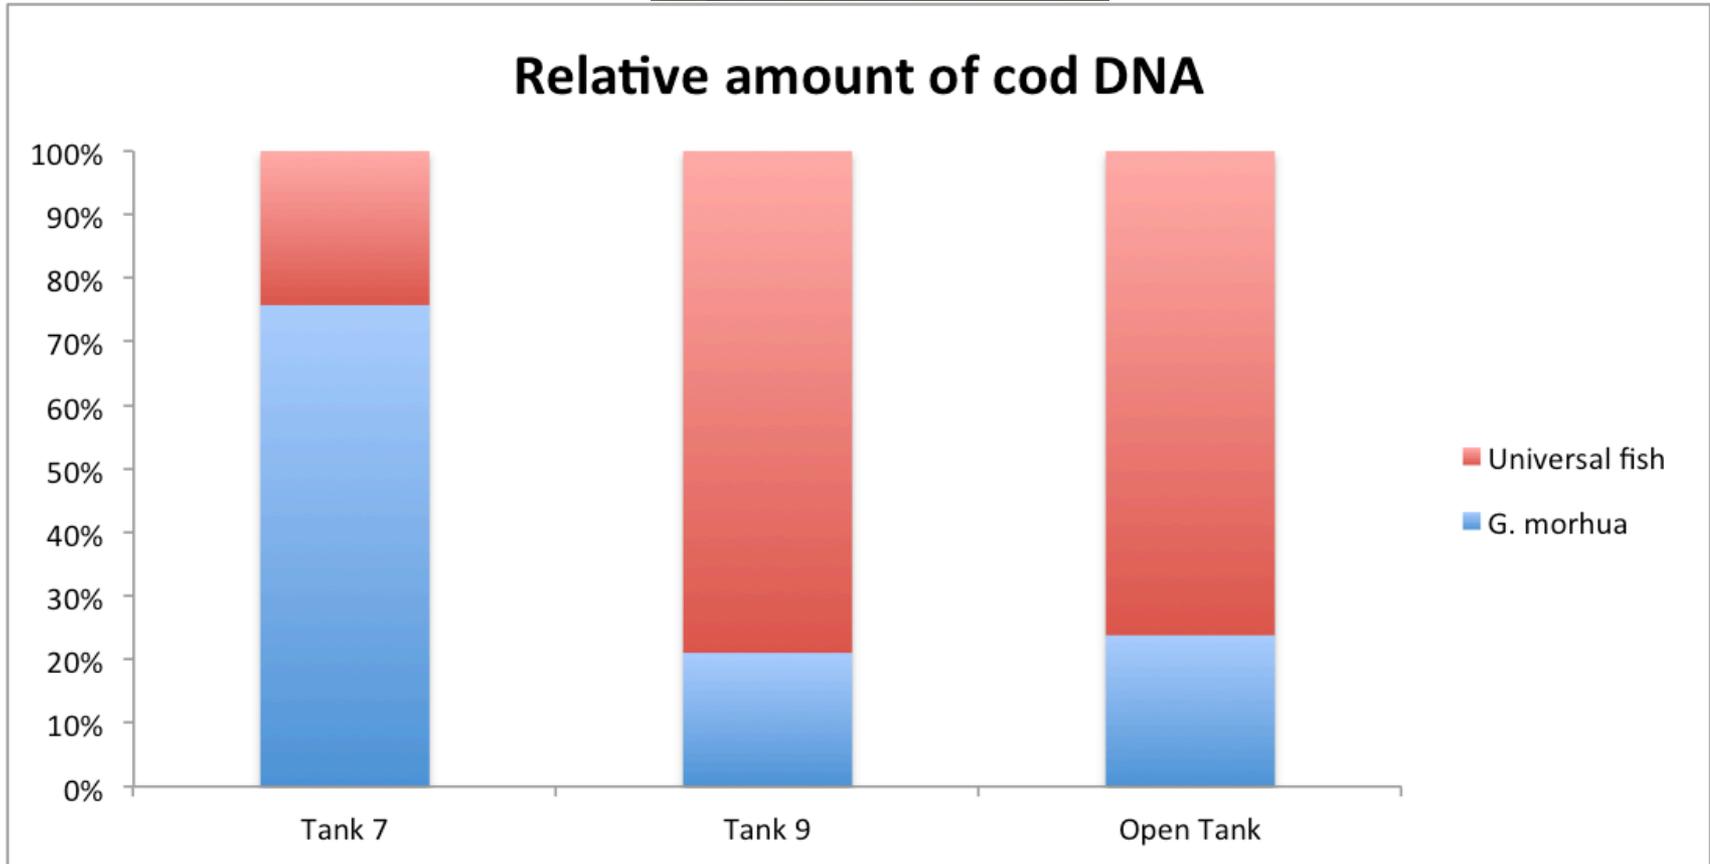

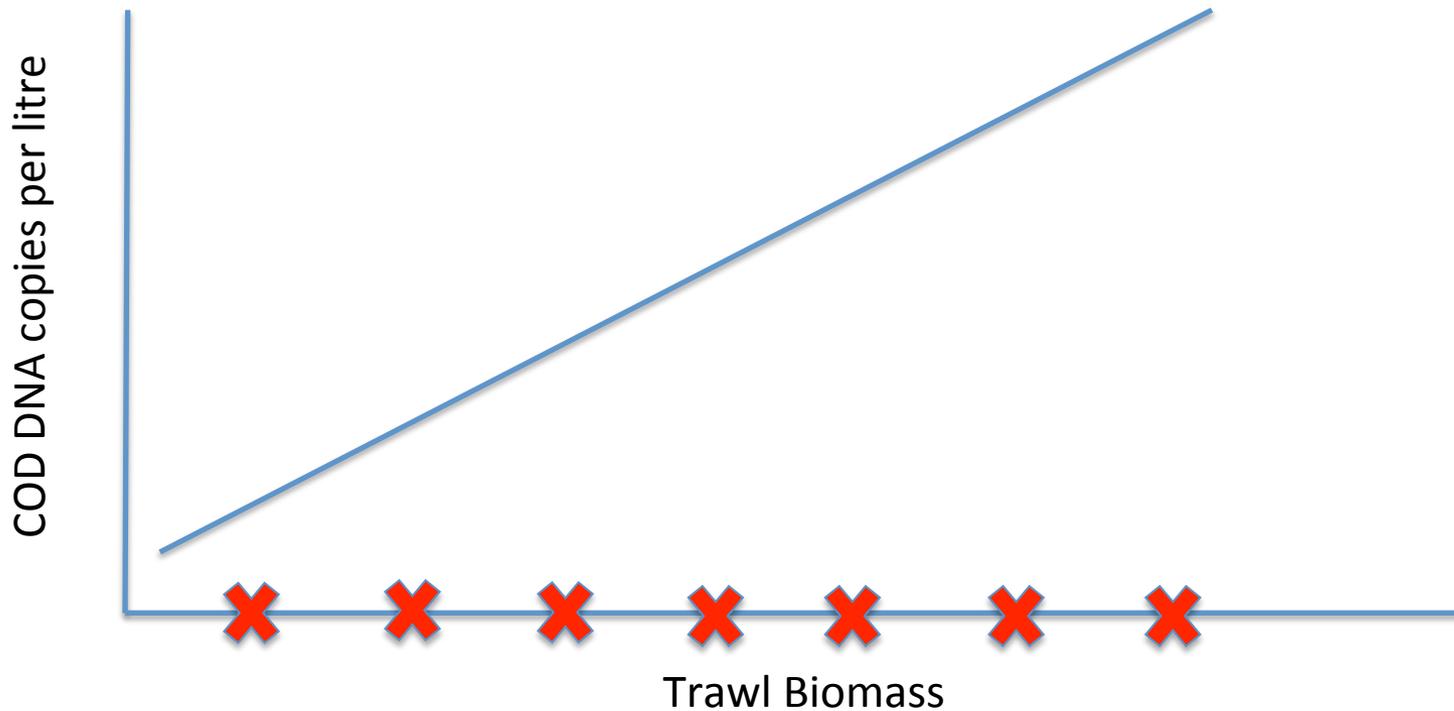

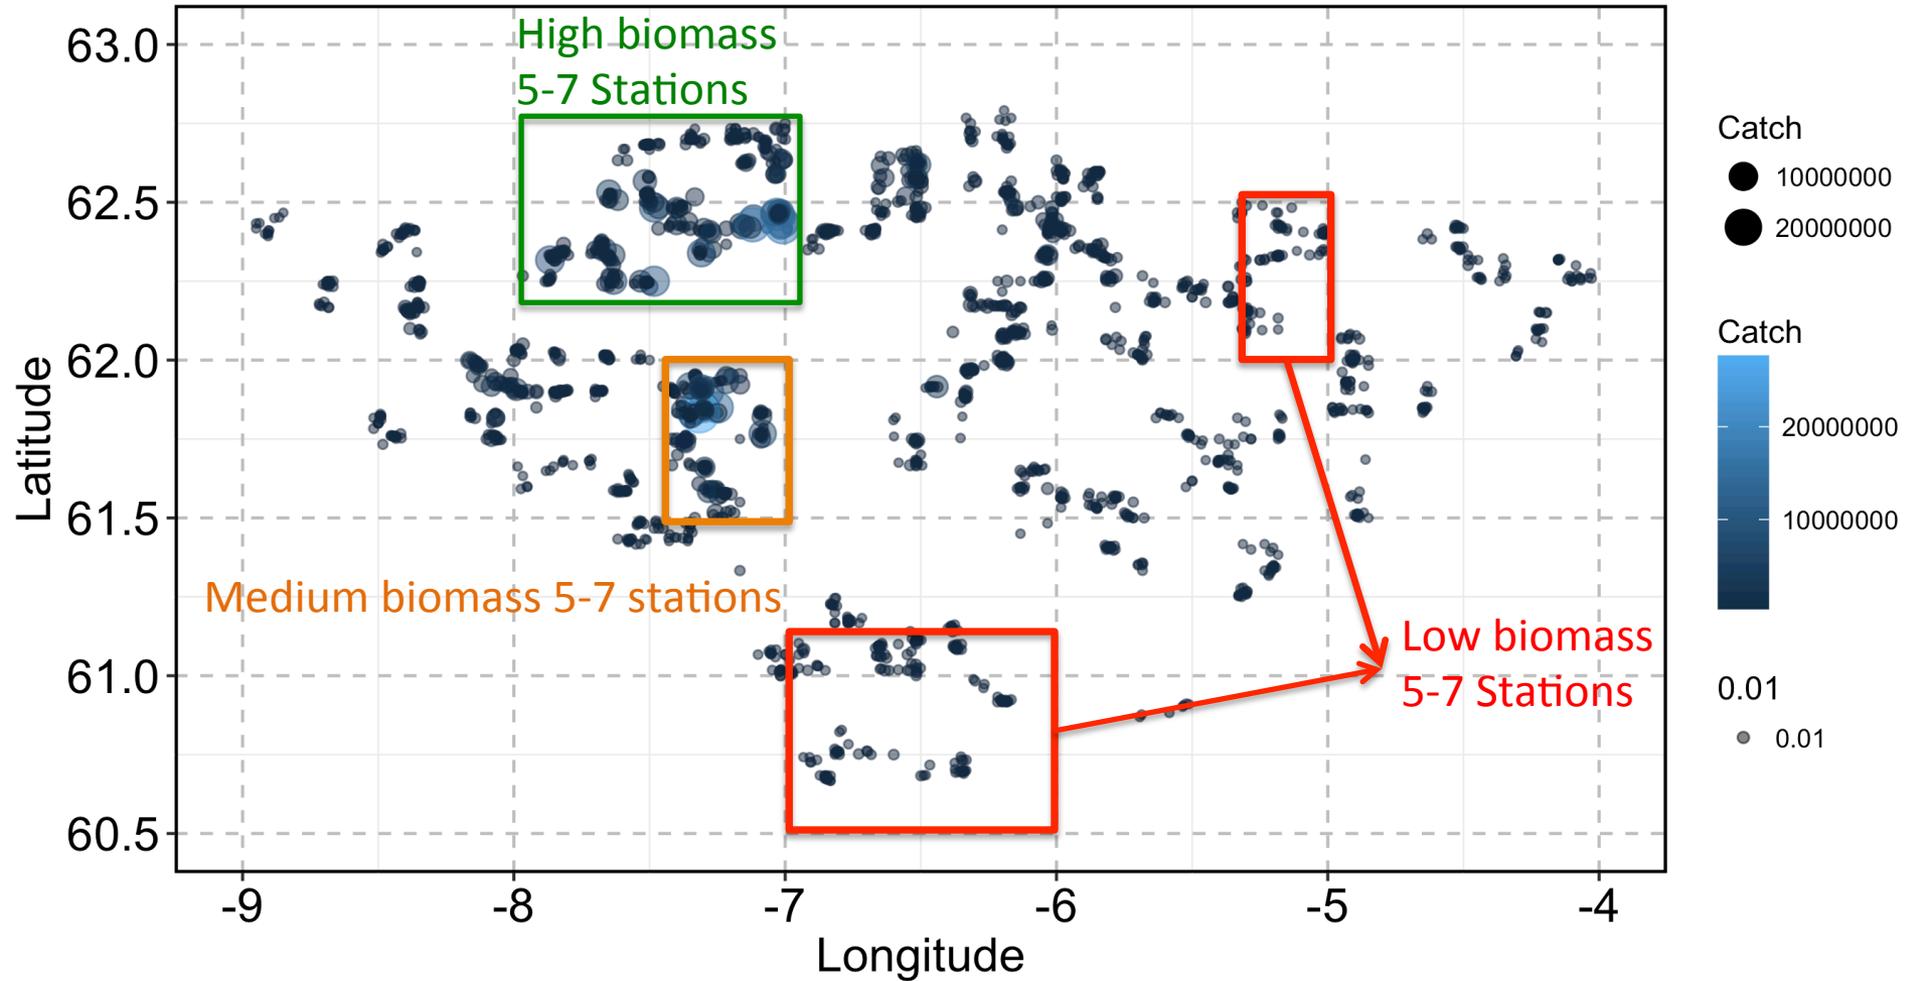

## Quantify Cod DNA in seawater and compare it to biomass in trawls

# Cod catch data - Landgrunnur

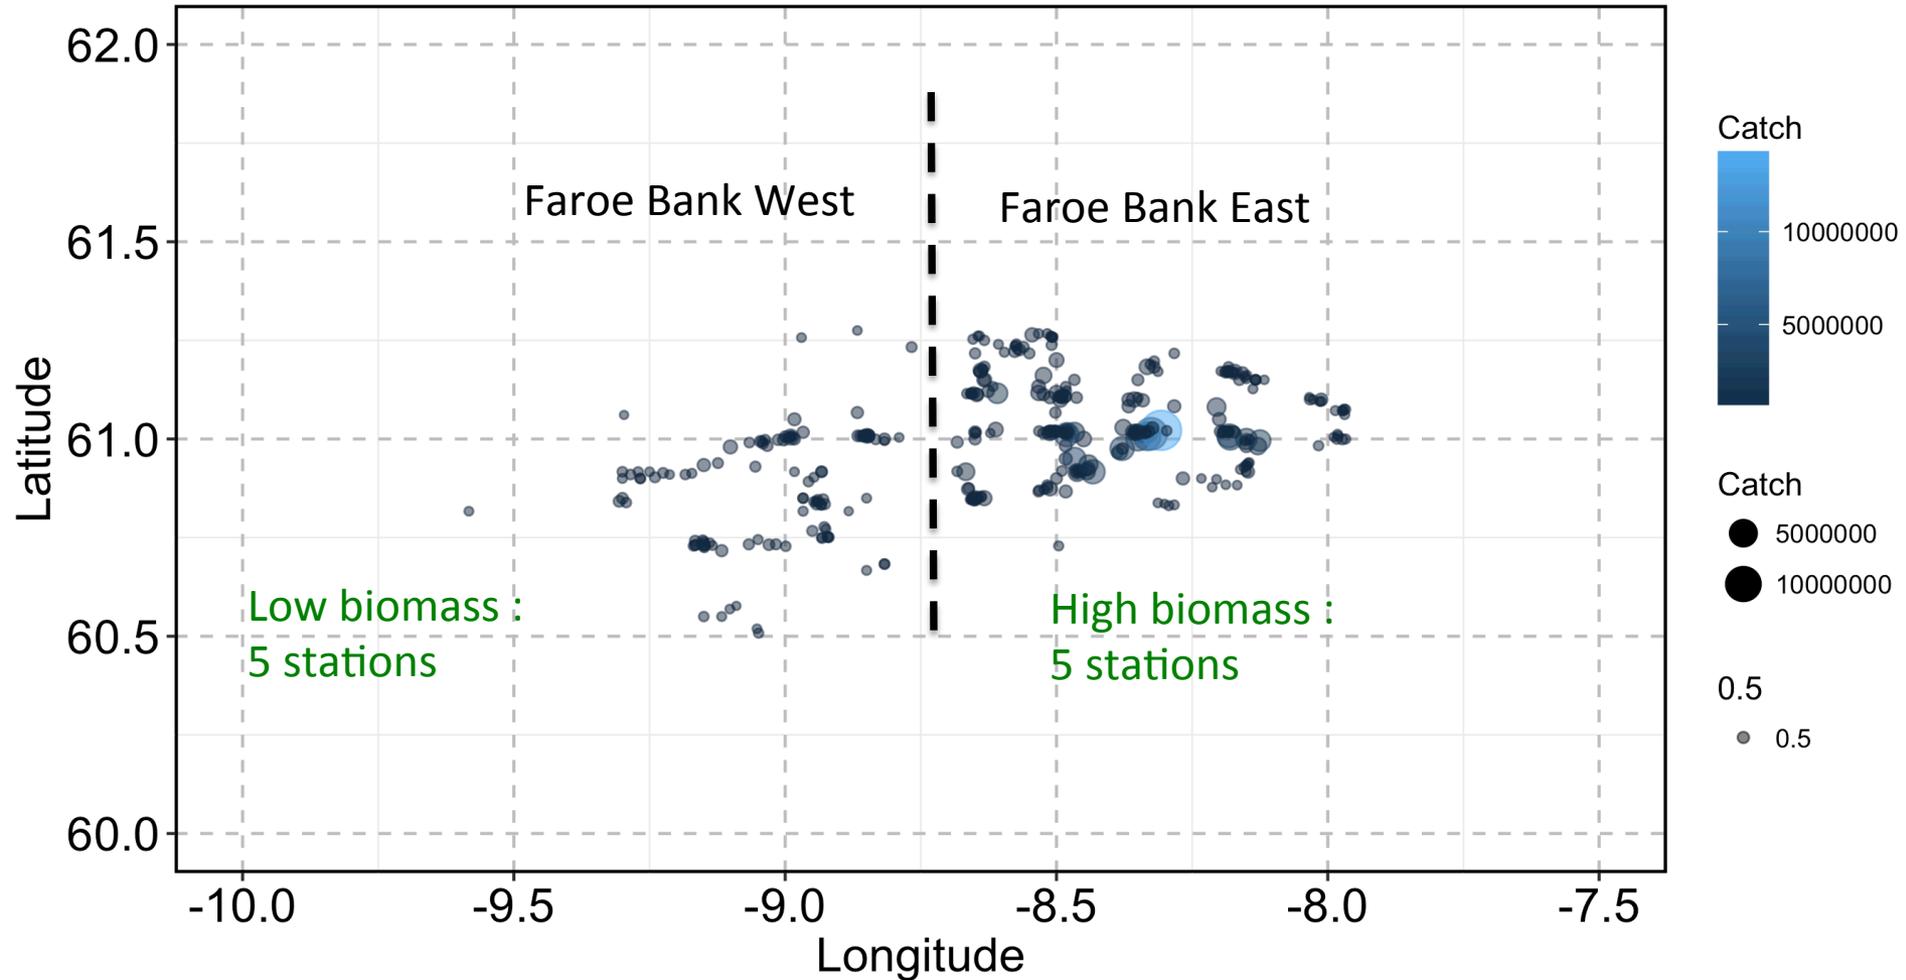

1994-2017

15-21 stations Landgrunnur (4 weeks)

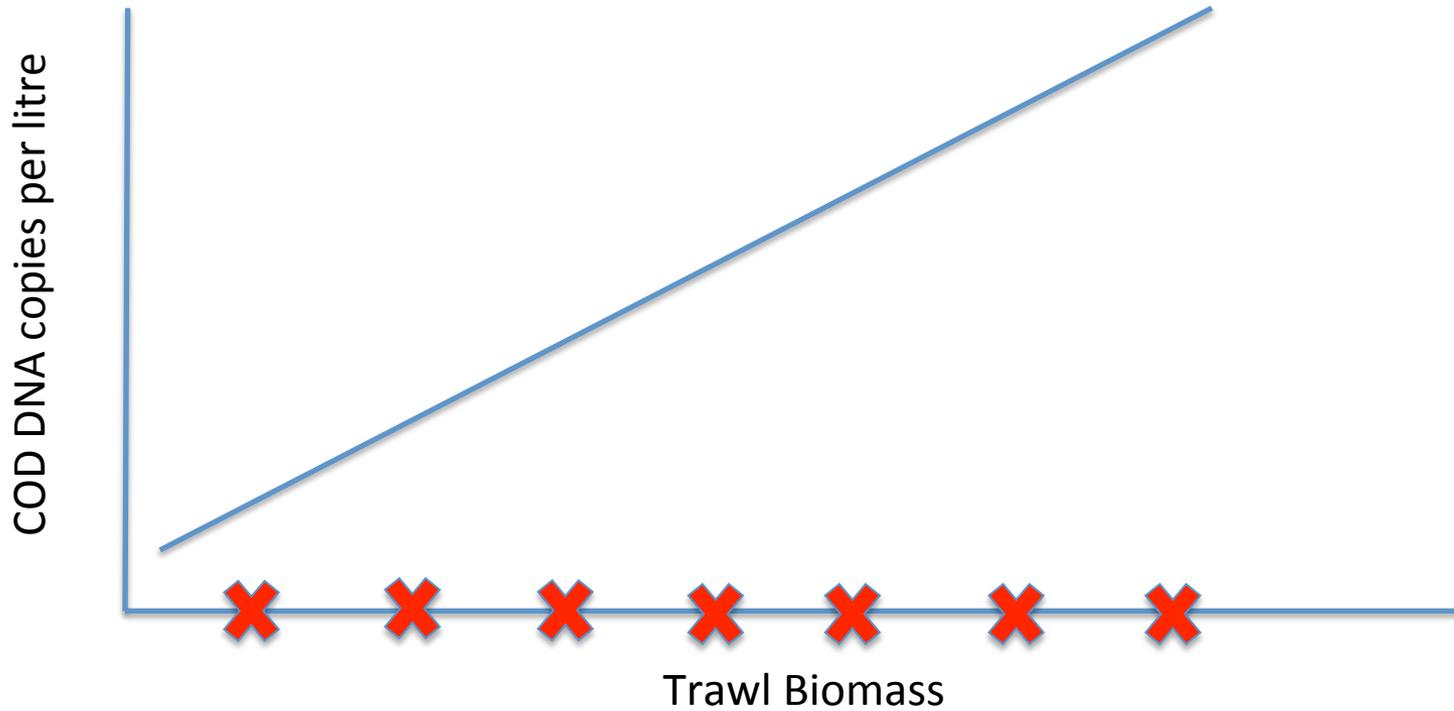

# Cod catch data – Faroe Bank Spring

1994-2017

10 stations Faroe Bank (1 week)

## Quantify Cod DNA in seawater and compare it to biomass in trawls

## ICES ANNUAL SCIENCE CONFERENCE 2018

- › Home
- › Call for abstracts
- › **Theme sessions**
- › Invited speakers
- › Early Career Scientists
- › Key dates and deadlines
- › Past ASCs

### Theme sessions

This year the ASC offers 18 different theme sessions.

The call for abstracts will open in January 2018.

#### Theme session A

**Mesopelagic ecosystems: fish and invertebrate population biomass and biodiversity, and role in carbon flux**

Conveners:  
Webjørn Melle (Norway)  
Antonina dos Santos (Portugal)  
Peter. H. Wiebe (USA)

#### Theme session B

**Modernizing fisheries stock assessment and monitoring with genetic methods**

Conveners:  
Nathan G. Taylor (Canada)  
Rich Hillary (Australia)  
Pascal Lorange (France)

#### Theme session C

**Assessing and analysing marine spatial planning - knowledge - indicators - visions**

Conveners:  
Andrea Morf (Sweden)  
Kira Gee (Germany)  
Riku Varjopuro (Finland)

#### Theme session D

**The Nordic seas and the Arctic – climatic variability and its impact on marine ecosystems, fisheries and policymaking**

Conveners:  
Harald Gjøsæter (Norway)  
Agnes Gundersen (Norway)  
Heino Fock (Germany)

**Theme session C**  
**Assessing and analysing marine spatial planning - knowledge - indicators - visions**

Conveners:  
Andrea Morf (Sweden)  
Kira Gee (Germany)  
Riku Varjopuro (Finland)

**Theme session D**  
**The Nordic seas and the Arctic – climatic variability and its impact on marine ecosystems, fisheries and policymaking**

Conveners:  
Harald Gjøsæter (Norway)  
Agnes Gundersen (Norway)  
Heino Fock (Germany)

Modernizing fisheries stock assessment and monitoring with genetic methods

Independent of trawl and vessel specificities

Capable of screening for all fish species  
simultaneously

DNA can be archived indefinitely for retrospective  
analysis

Data can be obtained from non-trawling  
oceanographic cruises

Data can be obtained remotely using in-situ water  
sampling devices
