Umsitingarætlan má eftirmetast av ICES

FAROE ISLANDS
SUSTAINABLE FISHERIES

- Tað var ein fortreyt fyri at fáa toska- og hýsufiskiskapin undir Føroyum MSC góðkendan, at myndugleikarnir samtyktu umsitingarætlanir fyri hesar stovnar.
- Hetta skal politiska skipanin fáa rós fyri at fáa sett í verk
- Og umsitingarætlanirnar **skulu** eftirmetast av ICES. Tað er tí alneyðugt at gera í næstum, annars kunnu vit missa MSC góðkenningina aftur.
- Øll fiskasløg undir Føroyum mugu hava umsitingarætlan
- Verandi umsitingarætlan umfatar tó bert tosk, hýsu og upsa
- Neyðugt er eisini at hava umsitingarætlanir fyri longu og brosmu.

Samstarv við Havstovuna er avgerandi

- Havstovan er ein týðandi samstarvsfelagi.
- Prógv um árin línufiskiskapur hevur á sjófugl
- FISF fekk fígging frá FVR til verkætlan um ávirkanina fiskiskapur hevur á sjófugl (ETP sløg). Havstovan hevur útført arbeiðið.
    - Eygleiðari var umborð á fiskiførum, sum fiskaðu við línu undir Føroyum.

Upptøka hjá Silasi Olofssyni, fuglafrøðingi, tá hann taldi sjófugl fyri FISF/Havstovuna
